

At Mattioni Plumbing, Heating & Cooling your family's safety and health are very important to us, and we would like to provide you with an option to keep your family safe while inside your home. Installing an Air Scrubber by Aerus® can clean your air, diminish allergy symptoms, and reduce your chances of getting sick by utilizing 3 different technologies. The Aerus® Air Scrubber kills viruses with ActivePure®, reduces dust with ionization, eliminates odor with ozone (optional).

Air Scrubber by Aerus® Benefits:

- Reduces Your Chance of Getting Sick. The Air Scrubber uses ActivePure® Technology which is proven to destroy up to 99% of all surface contaminants. Below is a study conducted by Kansas State University that shows the average reduction of contaminants on surfaces after using ActivePure® Technology.
- Reduces Dirt and Dust. The Air Scrubber doesn't just treat the air, it also helps to clean the dirt and dust off the surfaces of your home, such as countertops, bathrooms, kitchens, and doorknobs.
- Reduces Allergy and Asthma Symptoms. The Air Scrubber purifies and cleans the air in your home to reduce the irritating particles that worsen allergies and asthma.
- Reduces Odors. Whether you have pet odors, cigarette odors, or the occasional burnt food odors, the Air Scrubber is equipped with ozone to reduce all of those.
- Extends the Life of Your HVAC System. The Air Scrubber traps dirt, dust, and other natural debris before they enter the air filter, and before it can damage the coils and blower. A well-protected system can save you time and money on repairs.

If you would like to learn more about the Air Scrubber by Aerus®, give us a call or head over to [www.airscrubberbyaerus.com](http://www.airscrubberbyaerus.com)
